

## AMENDMENTS TO THE CLAIMS

### LISTING OF CLAIMS

1. (Currently amended) A weight-driven pusher for product on a gravity-fed display shelf with an associated back stop, comprising:

(A) a weight driven pusher frame defining a compartment containing a weight and adapted for sliding movement along the gravity-fed display shelf;

(B) a front plate mounted on said frame in a generally vertical orientation for bearing on the back of product, said front plate being manually selectively adjustable in upper reach relative to said frame to accommodate product of varying height and preclude product from tipping rearwardly over the pusher;

(C) a leg assembly retractably mounted on said frame adjacent the bottom thereof for retraction into said frame as the back of said leg assembly bears on a the associated back stop of the shelf; and

(D) means biasing said leg assembly to project rearwardly from said frame when the back of said leg assembly is spaced from the back stop, thereby to preclude product from tipping the pusher over backwards.

2. (Original) The pusher of Claim 1 wherein said leg assembly projects rearwardly in a generally horizontal plane.

3. (Currently amended) The pusher of Claim 1 wherein said front plate is manually selectively adjustable in a generally vertical plane to different vertical locations at which it is releasable retained.

Appl. No. 10/685,024  
Amdt. dated April 15, 2005  
Reply to Office Action of February 4, 2005

4. (Original) The pusher of Claim 3 wherein said leg assembly projects rearwardly in a generally horizontal plane.
